(54) CONTENTS DISTRIBUTION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a system capable of selecting contents while referring to a map by using a portable telephone convenient for carrying and capable of displaying contents but having no display capacity for displaying a map.

SOLUTION: When a destination, area information and the category of contents to be selected are inputted from an information terminal system 30 to a contents distribution system 10, a map obtained by synthesizing an index indicating the extracted contents with a segmented map is distributed as data allowed to be outputted by a printer 32. A contents list relating the link information of the contents to the index is distributed to a portable telephone 5. Thereby a user 90 can acquire the details of the newest contents from the telephone 5 on the basis of the index while referring to the map 6 printed out

on paper.
